

MODEL 4350

9' Utility Service Truck

The Model 4350 Service Truck body is engineered to exceed the requirements of the light to medium duty operator. All Model 4350 bodies feature 14 gauge steel construction. The strength of the unit is the structural steel frame engineered to handle demanding loads. The doors are constructed using 12 gauge steel and all cabinets are constructed using 14 gauge steel for heavy duty use. All cabinets are 21" deep. Optional equipment includes air compressors, generators, welders, tool cabinets and a retractable top cover. In addition to these options, the Model 4350 utility body can be equipped to accept optional cranes or an optional man-lift. Recommended crane lift capacities range from 1,000 lb. cranes to 4500 lb. electric over hydraulic cranes. *These cranes feature a pistol grip, feather touch controller with a trigger speed control option. An optional engine speed control package is also available. All crane applications require the optional manually operate downrigger package. What ever your requirements are, Feterl has the right service truck body, crane, lubrication truck, lubrication trailer or portable lubrication skid system to meet your needs!
